

A scatter plot showing the relationship between Gamma and Exponential distribution parameters. The x-axis is labeled 'Gamma' and the y-axis is labeled 'Exponential'. The plot contains several data points, mostly clustered in the lower-left region, with a few points extending towards the upper-right. The points are represented by small brown dots.

Von Mises
Uniform

A horizontal number line with tick marks at 0, 2, 4, and 6. The line is labeled with these numbers below the tick marks.
